

Included in the package

--> Rear Center Splitter

--> 8 X Screws

 We highly recommend having your products installed by a specialist.

Installation

Resources needed!

Screwdriver - Gloves - Cloth

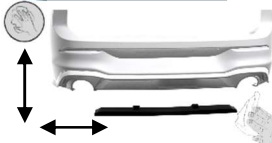

At least two people

Around 20 min

Cleaning

Clean the car's surface and the splitter with cleaner. Let the surfaces dry.

Centering

Center the splitter on the car's bumper to find the right place for the product to be installed. Make sure that the splitter is in the middle of the bumper.

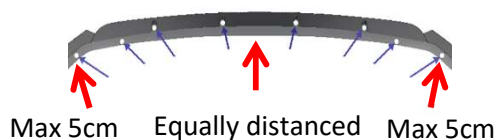

Attaching

Carefully place the rear center splitter on the car and attach the screws to their contact points. Screw the bolts while holding the rear center splitter to the right place.

 We recommend:

- ✓ Use 6 to 8 screws.
- ✓ The screws should be equally distanced from each other.
- ✓ The first screws at each side of the splitter should not be more than 5cm away from the edge of the product.

Vehicle Use

The vehicle is now ready to be used.
